

Our Key Products

Why we focus on this specialist area	Key products	Animal	Use
Endocrinology			
<p>Endocrine disease stems from imbalance in hormone levels, affecting cats or dogs in many ways, often requiring lifetime medical attention. Many endocrine disorders are fatal if not diagnosed and treated. Veterinarians place a high importance on quality of life and often see endocrinology as a challenging and interesting discipline.</p> 	Vetoryl®	Dogs	For the treatment of pituitary-dependent and adrenal-dependent hyperadrenocorticism (Cushing's disease and syndrome).
	Forthyron® / Thyforan® / Levocrine®	Dogs	For the treatment of hypothyroidism.
	Felimazole®	Cats	For the stabilisation of hyperthyroidism in cats prior to surgical thyroidectomy and the long term treatment of feline hyperthyroidism.
Dermatology and Care			
<p>Dermatology represents approximately 20% of veterinarians' clinical time and is a major focus area for the industry. Best practice techniques look to adopt more topical products as opposed to oral treatments, with the aim of utilising less antibiotics. Dechra's product portfolio is well positioned for this approach.</p> 	Canaural®	Cats Dogs	For the treatment of otitis externa including the ear mite, <i>Otodectes cynotis</i> .
	Isaderm	Dogs	For the topical treatment of surface pyoderma in the dog such as acute moist dermatitis (hot spots) and intertrigo (skin fold dermatitis).
	Malaseb	Cats Dogs	Cats: Medicated shampoo to aid the control and treatment of ringworm due to <i>Microsporum canis</i> in conjunction with griseofulvin. Dogs: Medicated shampoo for the treatment and control of seborrhoeic dermatitis associated with <i>Malassezia pachydermatis</i> and <i>Staphylococcus intermedius</i> .
	CleanAural®	Cats Dogs	A pH balanced routine ear cleaner. For the removal of moderate ear wax and debris where the ear drum is intact.
	DermaPet®, Triz, MalAcetic, Malaket and MiconHex+Triz	Cats Dogs	For the treatment of numerous skin and ear conditions.
Anaesthesia and Analgesia			
<p>Perioperative sedation and pain management are challenging but critical for all patients and form a fundamental part of animal welfare. A comprehensive range of analgesic and anaesthetic products allows veterinarians to adapt their protocols to the individual pet based on their level of discomfort, whilst providing flexible anaesthetic procedures.</p> 	Vetivex®	Cattle Cats Dogs Horses	This product is administered by intravenous infusion for the treatment of dehydration and metabolic acidosis. It may be used to correct volume depletion (hypovolaemia) resulting from gastrointestinal disease or shock.
	Sedator®	Cats Dogs	For restraint and sedation.
	Comfortan®	Cats Dogs	Analgesia. Premedication for general anaesthesia or neuroleptanalgesia in combination with a neuroleptic drug.
	Atipam®	Cats Dogs	Reverses the sedative effects of medetomidine and dexmedetomidine.
	Phycox®	Dogs Horses	Reduces joint discomfort and swelling.
Cardiovascular Disease			
<p>As pets increasingly live longer, managing heart disease efficiently is critical. This is our only major product in this category.</p> 	Cardisure®	Dogs	For the treatment of congestive heart failure originating from valvular insufficiency (mitral and/or tricuspid regurgitation) or dilated cardiomyopathy.

Why we focus on this specialist area	Key products	Animal	Use
Ophthalmology			
<p>Eye conditions are very common and can result in severe complications. Recent evidence suggests that 7% of kittens, 2% to 3% of adult cats and 2% to 4% of dogs are presented to veterinarians with ocular inflammation.</p> 	Isathal[®]	Cats Dogs Rabbits	For the topical treatment of conjunctivitis associated with staphylococcal infections.
	Lubrithal[®]	Cats Dogs	Soothes and moisturises the eye.
	Vetropolycin[®] and Vetroploycin[®] HC	Cats Dogs	For the treatment of superficial bacterial infections of the eyelid and conjunctiva when due to organisms susceptible to the antibiotics contained in the ointment.
Equine Medicine			
<p>This is a sector in which few animal health companies specialise. We target both performance horses and hobby horses and have developed a comprehensive range of medically necessary products that give us access to equine veterinarians.</p> 	Equipalazone[®]	Horses	For the treatment of musculoskeletal disorders in horses and ponies where the anti-inflammatory and analgesic properties of phenylbutazone can offer relief, such as lameness associated with osteoarthritic conditions, acute and chronic laminitis, bursitis and carpalitis, and in the reduction of post-surgical soft tissue reaction.
	Osphos[®]	Horses	For the control of clinical signs associated with the bone resorptive processes of navicular syndrome.
	HY-50[®]	Horses	For intra-articular and intravenous treatment of lameness caused by joint dysfunction associated with non-infectious synovitis.
	Somulose[®]	Cats Cattle Dogs Horses	The product is indicated for euthanasia in dogs, cats, horses and cattle.
	Domidine[®]	Cattle Horses	For the sedation and slight analgesia of horses and cattle; to facilitate physical examinations and treatments, such as minor surgical interventions.
Food Producing Animal Products			
<p>FAP is the largest segment of the global animal health market accounting for almost 60% of sales. While there is pressure on antibiotic prescribing in the EU and the US, the increased demand for high quality protein in the rest of the world continues to drive the demand for antibiotics.</p> 	Soludox[®]	Chickens Pigs Turkeys	For respiratory disease in pigs, chickens and turkeys.
	Octacillin[®]	Chickens Pigs	Treatment of infections caused by bacteria susceptible to amoxicillin.
	Methoxaso[®]	Broilers Pigs	Broilers: Treatment and prevention of respiratory infections caused by <i>Escherichia coli</i> susceptible to trimethoprim and sulfamethoxazole where the disease has been diagnosed in the flock. Pigs: Treatment and prevention of respiratory infections caused by <i>Actinobacillus pleuropneumoniae</i> susceptible to trimethoprim and sulfamethoxazole where the disease has been diagnosed in the herd.
	Cyclopray[®]	Cattle Pigs Sheep	Prevention of infections of superficial traumatic or surgical wounds caused by micro-organisms sensitive to chlortetracycline. The product can be used as part of a treatment for superficial claw/hoof infections, in particular interdigital dermatitis (foot rot) in sheep and digital dermatitis in cattle.
	Rapidexon[®]	Cats Cattle Dogs Horses Pigs	Dexamethasone may be used for the treatment of inflammatory or allergic conditions.
Pet Diets			
<p>Quality nutrition leads to quality of life for pets and veterinarians are best placed to offer nutritional advice. With our range of nutritional products, along with licensed and non-licensed medicines, we are able to offer holistic solutions to veterinarians to manage their patients in the most appropriate manner.</p> 	Specific[™]	Cats Dogs	Balanced high quality pet diets for therapeutic use and life stage maintenance diets.
